AGRICULTURAL LIMESTONE IN ILLINOIS IN 1930-1931

In cooperation with Mid-West Agricultural
Limestone Institute

The following table is a report of agricultural limestone marketed in each county of Illinois in 1930 and 1931. Detailed 1931 statistics for each county were received from producers within the State and from those in Indiana, Iowa, Wisconsin, and Missouri who ship agricultural limestone into Illinois. A few producers did not report and their production of agricultural limestone as reported on the United States Bureau of Mines cooperative questionnaire was allocated among the counties in which they produce and in neighboring counties. The total amount thus distributed amounted to 20,440 tons or 7.6 per cent. This amount represents part of the production from Adams, Bond, Calhoun, Clark, Johnson, Monroe, Saline, St. Clair, Washington, Whiteside, and Will counties and is allocated to these same counties and to Alexander, Crawford, Cumberland, DuPage, Edgar, Grundy, Jasper, Kendall, Massac, Pulaski, and Williamson counties. Returns for which county reports were received account for 92.4 per cent of the total agricultural limestone marketed.
